LINKUP ARCHITECTURE & BILLING SPECIFICATIONS

Video Call Duration, Auto-Cut & Revenue Calculation Report

Standard Packages: 5, 10, 15 Mins | **Settlement:** 70% Creator / 30% Platform | **DB:** Supabase AWS Mumbai

1. Executive Summary

LinkUp enforces standardized **5-minute, 10-minute, and 15-minute** video call packages across all user touchpoints (Creator Profile, Booking Flow, and Video Calls Feed). The system combines an upfront Escrow lock with live 60-second usage tracking, an automated timeout cut-off at 00:00, and a strict 70/30 revenue distribution.

- **Standard Packages:** 5 Mins (250 Coins), 10 Mins (500 Coins), and 15 Mins (750 Coins) based on standard 50 coins/min rate.
- **Automatic Cut-off:** Call terminates immediately at 00:00 (secondsRemaining ≤ 1) with CALL_TIMEOUT status on both devices.
- **Live Visual Pill:** Shows live remaining countdown (e.g. '04:59 left') with color transitions and a 60-second warning banner.
- **Early Disconnect Refund:** If caller ends call before package expires, unused locked escrow coins are refunded instantly.

2. Duration Packages & Pricing Formula

`Pricing Formula: Total Coins (C) = Duration in Mins (M) × Rate per Min (R)  |  Default Rate = 50 Coins/min`

Package Name	Duration	Seconds	Total Coins	Equivalent INR
Quick Chat	5 Mins	300 s	**250 Coins**	■250
Standard Session	10 Mins	600 s	**500 Coins**	■500
Extended VIP	15 Mins	900 s	**750 Coins**	■750

3. Revenue Distribution (70% Creator / 30% Platform Split)

On call completion or timeout auto-cut, the total consumed coins are atomically split in database ledger:

Package	Duration	Total Coins	Creator Share (70%)	Platform Fee (30%)	Ledger Check
Quick Call	5 Mins	250	**175 Coins**	**75 Coins**	175 + 75 = 250 ✓
Standard	10 Mins	500	**350 Coins**	**150 Coins**	350 + 150 = 500 ✓
Extended VIP	15 Mins	750	**525 Coins**	**225 Coins**	525 + 225 = 750 ✓

4. Escrow Hold & Early Hangup Protection

■ **Zero Coin Leakage Guarantee:** When a package is chosen, coins are placed in Escrow (lockedCoins). If caller disconnects early (e.g. 2 mins into a 5-min session), only the consumed 2 minutes (100 coins) are charged. The unused remainder of **150 coins is immediately returned to Available Balance**.

Booked Package	Actual Call Time	Charged Coins	Refund to Caller	Creator Payout (70%)	Platform Fee (30%)

5 Mins (250 Coins)	5m 00s (Auto-Cut)	250 Coins	0 Coins	175 Coins	75 Coins
5 Mins (250 Coins)	1m 45s (Early Cut)	100 Coins (2m)	**+150 Coins**	70 Coins	30 Coins
10 Mins (500 Coins)	4m 10s (Early Cut)	250 Coins (5m)	**+250 Coins**	175 Coins	75 Coins

5. Technical Verification & Implementation Matrix

Component	File Path	Status	Verification Detail
Duration Selector	`lib/screens/creator_detail_screen.dart`	**VERIFIED**	Standardized 5, 10, 15 min packages with dynamic pricing.
Calling Router	`lib/screens/calling_screen.dart`	**VERIFIED**	Passes durationMinutes & initialDurationSeconds.
Auto-Cut Engine	`lib/screens/active_call_screen.dart`	**VERIFIED**	Live countdown, 60s warning banner, 00:00 timeout disconnect.
Quick Call Modal	`lib/screens/video_calls_screen.dart`	**VERIFIED**	Interactive 5, 10, 15 min modal with _textPrimary fix.
Escrow Refund	`lib/services/app_state.dart`	**VERIFIED**	Refunds unused lockedCoins automatically on early disconnect.
Database Cloud	`Supabase PostgreSQL (AWS Mumbai)`	**LIVE**	Prisma CallSessions, atomic debits, and 70/30 payouts synced.
